Conservation of coherent-error information under RC ($\theta = 0.2$)
Fisher information about θ (units of F_0)
tailoring $T = 1 - |\mu|$
0.0

RC keeps this
RC discards this
(recoverable from labels)
F_{marg} (RC keeps this)
$\mathbb{E}_b[F_{s|b}]$ (RC discards — recoverable)
sum $= F_0 = 1$ (conserved)
$(1-T)^2$ (leading order)
$2T - T^2$ (leading order)
